religious world, will be profoundly inter-

WHY CHARLEY HATTON?

Topeka so we must take our politics from the same source. The bumptious Dawes says that personally he has not sought to defeat the Republican ticket in Sedgwick county, but that the election of Charles Hatton as judge of the district court would be regretted by himself. The members of the inner circles of the state administration, however, unhesitatingly declare, that whatever becomes of the county ticket the election of Hatton would be an indorsement of the Eagle and a repudiation of Governor Morrill's police commission, and particularly a protes against the methods of Tiger Bill and his conferees. This information be ing unquestionably reliable it is plain that the state administration don't care what becomes of the Republican ticket so Hatton is defeated. Their fear eems to be that the Eagle will be sus tained. Hatton having been by order of the administration kicked out of the police judgeship, his defeat at the polls would be taken as an indorsement of that outrage. So the word has gone out to defeat Hatton at whatever cost, the pretext or excuse being that his rulings were antagonistic to the prosecutions incited by the Law and Order

There is no party or political reason, Hatton should not have every Republican vote in the county. Of course he cannot be made a tool of by the extreme faction which is influencing Morrill in his dealings with this city, but he was nominated squarely and honorably under the Crawford county sysem. That the gang of implacables will scratch him there is no room for doubt, but he ought to more than make up for such loss in the support of men chose sense of right and decency was manhood would not permit him to bethough the outfit was backed by the state administration

THE GOVERNORS AND CUBA. Throughout the United States, in

TRAMP STATISTICS Three years ago, Professor J. J. Mc Cook, a writer on social questions, es timated, after a careful study of statistics, that there were 45.545 tramps in the United States, and that their direc annual cost to the country was \$9,-000,000. He now states that in January, 1895, the number of tramps had increased to 85,768, and their annual cost to the country \$17,000,000, not counting the loss sustained by their failure to produce anything. The average tramp, he says, is orig-

inally a skilled laborer, and in the majority of cases he has some trade Manufacturers say that the tramp workman is usually up to the average in cleverness, but he is generally a drinking man, and so, when duliness or depression in trade comes he is the first to be discharged from factories. Professor McCook thinks that when the tramp finds he can wax strong and fat without effort he is loath to return to work, and he suggests various ways by which the evil may be remedied. In 1880 Massachusetts established a aside from prejudice, why Charles penalty for vagrancy of from one to tive years in the house of correction, and from one to three years in the state workhouse. The result was that 1.217 tramps fled from the state the first year after the law went into effect; but they fled to the next state.

AN EDEN WITH NO ADAM.

Do our girls know too much or our boys too little? That is a sad tale of a "cross in love" which comes from Chicago, of a broken-hearted girl whose outraged in the way he was kicked out, lover married her sister, the only reaand kicked out only because his innate son given by him for deserting the first sister being she was "too well come the pliant tool of the junto, even educated." Is there not something to this, and who will explain the why of Mrs. Easton acknowledge more justly. it? Is it not a fact that few men would have the courage to marry a cultured Boston girl? Where is the man who had not graduated at Harvard or Yale that could muster up the courage to even put into words a pro- buttoned coat; long light curiy hair, by this country are being circulated posal of marriage to one of Boston's bespectacled intellectualities?
